PROFESSIONAL SUMMARY

Second-year **BA in Humanities and Digital Technologies** student at The University of Hong Kong, a first-of-its-kind interdisciplinary programme in Asia that fuses humanities training with digital technologies, data literacy, AI, and project-based learning to cultivate innovative problem-solvers. Also pursuing a second major in **Computer Science**.

Focused on video game development, VR, and interactive media, with hands-on experience in C++, C#, Unity, and Unreal Engine. I come at technology from two directions at once: CS gives me the tools to build, HDT and philosophy give me the framework to question what I'm building and for whom. That combination shows up in everything from game mechanics to VR environments to AI tooling. I lead, I ship, and I don't stop at "does it work."

WORK EXPERIENCE

Arts Tech Lab – Student Helper

Jan 2026–Current · The University of Hong Kong

- Improved daily operations by modernizing inventory system with QR Code labelling and provided technical support for XR facilities.
- Developing an AI-powered lab assistant agent using n8n and MongoDB to automate responses to student inquiries and equipment requests.
- Improved and supported the "House of Serenos" VR demo for public exhibition, fixing interaction and height issues, and providing on-site support.
